Williams analyses and compares the ways in which African Americans and the Welsh have defined themselves as minorities within larger nation states (the UK and US). The study is grounded in examples of actual friendships and cultural exchanges between African Americans and the Welsh, such as Paul Robeson ' s connections with the socialists of the Welsh mining communities, and novelist Ralph Ellison ' s stories about his experiences as a GI stationed in wartime Swansea. This wide ranging book draws on literary, historical, visual and musical sources to open up new avenues of research in Welsh and African American studies.

In Wales Unchained Daniel G. Williams explores how Welsh writers, politicians and intellectuals have defined themselves – and have been defined by others – since the early twentieth century. Whether by exploring ideas of race in the 1930s or reflecting on the metaphorical uses of boxing, asking what it means to inhabit the ' American century ' or probing the linguistic bases of cultural identity, Williams writes with a rare blend of theoretical sophistication and accessible clarity. This book discusses Rhys Davies in relation to D. H. Lawrence, explores the simultaneous impact that Dylan Thomas and saxophonist Charlie Parker had on the Beat Generation in 1950s America, and juxtaposes the uses made of class and ethnicity in the thought of Aneurin Bevan and Paul Robeson. Transatlantic in scope and comparative in method, this book will engage readers interested in literature, politics, history and contemporary cultural debate.

Black British musicians have been making jazz since around 1920 when the genre first arrived in Britain. This groundbreaking book reveals their hidden history and major contribution to the development of jazz in the UK. More than this, though, the chapters show the importance of black British jazz in terms of musical hybridity and the cultural significance of race. Decades before Steel Pulse, Soul II Soul, or Dizzee Rascal pushed their way into the mainstream, black British musicians were playing jazz in venues up and down the country from dance halls to tiny clubs. In an important sense, then, black British jazz demonstrates the crucial importance of musical migration in the musical history of the nation, and the links between popular and avant-garde forms. But the volume also provides a case study in how music of the African diaspora reverberates around the world, beyond the shores of the USA - the engine-house of global black music. As such it will engage scholars of music and cultural studies not only in Britain, but across the world.

The population of Wales is the product of successive waves of immigration. During the industrial revolution many diverse groups were attracted into Wales by the economic opportunities it offered – notably Irish people, black and minority ethnic sailors from many parts of the world, and people from continental Europe. More recently, there has been immigration from the New Commonwealth as well as refugees from wars and oppression in several parts of the world. This volume engages with this experience by offering perspectives from historians, sociologists, cultural analysts and social policy experts. It provides analyses of the changing patterns of immigration and their reception including hostile and violent acts. It also considers the way in which Welsh attitudes to minorities have been shaped in the past through the activity of missionaries in the British Empire, and how these have permeated literary perceptions of Wales. In the contemporary world, this diverse population has implications for social policy which are explored in a number of contexts, including in rural Wales. The achievements of minorities in sport and in building a multi-racial community in Butetown, for instance, which is now writing its own history, are recognised. The first edition of this book was widely welcomed as the essential work on the topic; over a decade later much has changed and the volume responds with several new chapters and extensive revisions that engage the impact of devolution on policy in Wales.

This 15-hour free course explored key aspects of the economy, society, politics and culture of contemporary Wales from a social science perspective.

In recent years researchers, both affiliated and independent, have done exciting new research on black people in Britain in the eighteenth and early nineteenth centuries, and even earlier. This book gathers this new work on people and events into a single, exciting new volume.

Crime Fiction in the City: Capital Crimes expands upon previous studies of the urban space and crime by reflecting on the treatment of the capital city, a repository of authority, national identity and culture, within crime fiction. This wide-ranging collection looks at capital cities across Europe, from the more traditional centres of power – Paris, Rome and London – to Europe ' s most northern capital, Stockholm, and also considers the newly devolved capitals, Dublin, Edinburgh and Cardiff. The texts under consideration span the nineteenth-century city mysteries to contemporary populist crime fiction. The collection opens with a reflective essay by Ian Rankin and aims to inaugurate a dialogue between Anglophone and European crime writing, to explore the marginalised works of Irish and Welsh writers alongside established European crime writers and to interrogate the relationship between fact and fiction, creativity and criticism, within the crime genre.
