Effective communication skills are crucial in all aspects of nursing practice - this book will enable you to communicate effectively and with confidence in your professional practice. It focusses on the communication skills needed for the development of effective professional and therapeutic relationships. It is a 'how to do it' book that relates the theory of effective and ethical communication to the practice of nursing and provides a framework for developing communication skills to meet a variety of nursing situations. Helps user to: ensure respect and dignity; communicate assertively; develop empathy and comfort skills; communicate effectively in a team; deal with difficult situations; and reflect on actual practice Offers an easy to use, attractive 2 colour design throughout. Written in a clear, consistent style to aid comprehension. Further reading and references point to the evidence and knowledge base.

2007 AJN Book of the Year Award Winner Nursing Education in the Clinical Setting provides a practical approach to clinical nursing instruction. Although grounded in adult learning theory, this unique resource provides practical suggestions and addresses common questions and issues. The text incorporates illustrative scenarios, discussion questions, and reflection exercises designed to facilitate thoughtful application of the content. Addresses the role transition for a nurse with clinical expertise to that of clinical nursing instructor. Provides important tips for effectively appraising student performance such as student involvement in self-evaluation and goal setting, and suggestions for how evaluation and appraisal are shared with the student. Incorporates sample scenarios to illustrate concepts and allow the reader to apply them. Integrates discussion questions and exercises designed to facilitate thoughtful application and critical thinking skills. Addresses all aspects of learning, including "cognitive" (e.g., critical thinking), "affective" (e.g., caring), and "psychomotor" (e.g., technical skills). Provides actual examples of tools to be used for documenting student performance and approaches for stimulating student involvement and critical thinking. Includes a separate chapter on Clinical Faculty as Clinical Coach that discusses how learning is facilitated in the clinical setting with the guidance of an effective teacher. Features a Clinical Toolbox that contains a variety of supplemental resources, including sample approaches for teaching and evaluation, suggestions for preparing anecdotal notes, and relevant reference material. Incorporates issues related to computer access of patient data banks for students, and the federal regulations mandated by HIPAA and their clinical education implications.

** By the authors of the acclaimed Introduction to Rubrics ** Major growth of interest in keeping journals or diaries for personal reflection and growth; and as a teaching tool ** Will appeal to college faculty, administrators and teachers One of the most powerful ways to learn, reflect and make sense of our lives is through journal keeping. This book presents the potential uses and benefits of journals for personal and professional development—particularly for those in academic life; and demonstrates journals' potential to foster college students' learning, fluency and voice, and creative thinking. In professional life, a journal helps to organize, prioritize and address the many expectations of a faculty member's or administrator's roles. Journals are effective for developing time management skills, building problem-solving skills, fostering insight, and decreasing stress. Both writing and rereading journal entries allow the journal keeper to document thinking; to track changes and review observations; and to examine assumptions and so gain fresh perspectives and insights over past events. The authors present the background to help readers make an informed decision about the value of journals and to determine whether journals will fit appropriately with their teaching objectives or help manage their personal and professional lives. They offer insights and advice on selecting the format or formats and techniques most appropriate for the reader's purposes.

Each chapter focuses on an area of study within the undergraduate nursing program and the new edition continues its discussions on history, culture, ethics, law, technology, and professional issues within the field of nursing. Daly, UTS: Speedy, Southern Cross University; Jackson, University of Western Sydney, Australia.

This book is a clear and practical guide to help students develop critical thinking, writing and reflection skills. It explains what critical thinking is and how students should use it throughout their nursing programme. This new edition also provides an innovative new framework that helps students appreciate different levels of critical thinking and reflection to help nursing students appreciate the requirements of degree level study. The book demonstrates the transferable nature of critical thinking and reflection from academic contexts to the real practice of nursing. Key features Clear and straightforward introduction to critical thinking directly written for nursing students, with chapters relating the subject to specific study and practice contexts Student examples and scenarios throughout, including running case studies from four nursing students and further annotated examples of student's work on the website Each chapter is linked to the new NMC Standards and Essential Skills Clusters

With the growing interest in problem-based learning among nurse educators worldwide comes the need for a book that will be a comprehensive guide and resource for anyone considering its implementation in nursing education. This book is that resource. Its strength is its integration of relevant theory, research, and practical information. It is an invaluable resource for nursing faculty contemplating the use of the problem-based learning model.

Christopher Johns is an internationally recognised pioneer of reflective practice in nursing and health care: – Nursing Standard Becoming a Reflective Practitioner provides a unique insight into reflective practice, exploring the value of using models of reflection, with particular reference to Christopher Johns' own model for structured reflection. Now in its fifth edition, this book has been completely revised and updated to include up-to-date literature and reflective extracts. Contemporary in approach, this definitive text contains a variety of rich and insightful reflective extracts that support the main issues being raised in each chapter, and challenges practitioners and students to question their own practice. Now with further scenarios and case studies included throughout, these extracts provide the reader with access to the experience of reflective representation helping to explicate the way in which reflective practice can inform the wider notion of professional practice. With an increase in professional registration requiring reflective evidence, this new edition of Becoming a Reflective Practitioner is an essential guide to all those using reflection in everyday clinical practice.
