Aldo Leopold: Thinking Like a Mountain (Was reminded of one of my favorite environmental writings (by the hunter and conservationist) by Aldo Leopold after watching this news report in which the corporate chainstore Cabela's tries to justify there support of a "predator derby"... Original news report courtesy of Jane Garton.)

Dialogic: Aldo Leopold: Thinking Like a Mountain

When initially published more than twenty years ago, Thinking Like a Mountain was the first of a handful of efforts to capture the work and thought of America's most significant environmental thinker, Aldo Leopold.

This book of readings, meditations, rituals and workshop notes prepared on three continents provides a context for ritual identification with the natural environment. As relevant today as when it was originally published in 1988, this classic of the sustainability movement helps us experience our place in the web of life - rather than at the apex of some human-centered pyramid. An important deep ecology educational tool for activist, school and religious groups, it can also be used for personal reflection.

When initially published more than twenty years ago, Thinking Like a Mountain was the first of a handful of efforts to capture the work and thought of America's most significant environmental thinker, Aldo Leopold. This new edition of Susan Flader's masterful account of Leopold's philosophical journey, including a new preface reviewing recent Leopold scholarship, makes this classic case study available again and brings much-deserved attention to the continuing influence and importance of Leopold today. Thinking Like a Mountain unfolds with Flader's close analysis of Leopold's essay of the same title, which explores issues of predation by studying the interrelationships between deer, wolves, and forests. Flader shows how his approach to wildlife management and species preservation evolved from his experiences restoring the deer population in the Southwestern United States, his study of the German system of forest and wildlife management, and his efforts to combat the overpopulation of deer in Wisconsin. His own intellectual development parallels the formation of the conservation movement, reflecting his struggle to understand the relationship between the land and its human and animal inhabitants. Drawing from the entire corpus of Leopold's works, including published and unpublished writing, correspondence, field notes, and journals, Flader places Leopold in his historical context. In addition, a biographical sketch draws on personal interviews with family, friends, and colleagues to illuminate his many roles as scientist, philosopher, citizen, policy maker, and teacher. Flader's insight and profound appreciation of the issues make Thinking Like a Mountain a standard source for readers interested in Leopold scholarship and the development of ecology and conservation in the twentieth century.

In twenty short books, Penguin brings you the classics of the environmental movement. In this lyrical meditation on America's wildlands, Aldo Leopold considers the different ways humans shape the natural landscape, and describes for the first time the far-reaching phenomenon now known as 'trophic cascades'. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.

A provocative argument that environmental thinking would be better off if it dropped the concept of "nature" altogether and spoke instead of the built environment.

Nature has been Robert Bateman's inspiration ever since he began painting birds from his bedroom window as a young boy. The wildlife he features in his paintings are expressions of his love and respect for the natural world. A passionate environmentalist who has devoted his life to documenting the awesome power of nature, Bateman is deeply worried about the state of our planet and the fate of our natural heritage. Whenever he talks about his paintings, he talks about the environmental messages they convey, and those who have heard him speak have clamoured for a book that encapsulates his philosophy. Thinking Like a Mountain is the result of many years of thinking, talking and writing about the world's growing environmental crisis. Beautifully designed and illustrated with original drawings, it is a gathering of questions, observations and ideas Robert Bateman has drawn from his own life experiences and gleaned from the writings of some of the visionaries who have influenced him. As Einstein said, "We cannot solve the problems of today with the same thinking that gave us the problems in the first place."Only a profound shift in philosophy, Bateman believes, can save our species from extinction. Thinking Like a Mountain is printed on 100 per cent ancient-forest-free paper that is 100 per cent post-consumer recycled and has been processed chlorine free.

Few books have had a greater impact than A Sand County Almanac, which many credit with launching a revolution in land management. Written as a series of sketches based principally upon the flora and fauna in a rural part of Wisconsin, the book, originally published by Oxford in 1949, gathers informal pieces written by Leopold over a forty-year period as he traveled through the woodlands of Wisconsin, Iowa, Arizona, Sonora, Oregon, Manitoba, and elsewhere; a final section addresses the philosophical issues involved in wildlife conservation. Beloved for its description and evocation of the natural world, Leopold's book, which has sold well over 2 million copies, remains a foundational text in environmental science and a national treasure.

This stunning fantasy inspired by Chinese folklore is a companion novel to Starry River of the Sky and the New York Times bestselling and National Book Award finalist When the Sea Turned to Silver In the valley of Fruitless mountain, a young girl named Minli lives in a ramshackle hut with her parents. In the evenings, her father regales her with old folktales of the Jade Dragon and the Old Man on the Moon, who knows the answers to all of life's questions. Inspired by these stories, Minli sets off on an extraordinary journey to find the Old Man on the Moon to ask him how she can change her family's fortune. She encounters an assorted cast of characters and magical creatures along the way, including a dragon who accompanies her on her quest for the ultimate answer. Grace Lin, author of the beloved Year of the Dog and Year of the Rat returns with a wondrous story of adventure, faith, and friendship. A fantasy crossed with Chinese folklore, Where the Mountain Meets the Moon is a timeless story reminiscent of The Wizard of Oz and Kelly Barnhill's The Girl Who Drank the Moon. Her beautiful illustrations, printed in full-color, accompany the text throughout. Once again, she has created a charming, engaging book for young readers.

"In the West, shortsighted human self-interest has resulted in devastating environmental losses. Fur trade beaver trapping meant streams and wetland ecosystems deteriorated. Grazing livestock depleted native bunch grasses. Migrating Idaho Salmon once reached the ocean in ten to fourteen days. Now dams stretch the journey to fifty or more. The author's goal is to encourage people to think like a mountain—to consider long-term consequences. His essays examine cultural conflicts over resource extraction, threats to watersheds by abandoned mines, wolf recovery in the northern Rocky Mountains, the lingering effects of livestock grazing on western rangelands, and the rapidly disappearing sage grouse. They discuss the importance of forest fires, the value of beavers, the failed promises of salmon hatcheries, the reasons behind the decline of the timber industry in the Pacific Northwest, and how unlikely allies learned to set aside their differences in order to resolve long-standing disputes."-->
